5015	82.0	2	1	0	1	1	3	2	0	Hard code Unit in menu part, you can use instruction that Aj. Jim suggest in PA3 sheet, use helper method e.g. getUnit to get any Unit that Converter can support. No UML diagram. There is many part that doesn't have javadoc, be careful it cost you a point.
5023	75.0	1	1	1	1	1	3	4	2	Jar file requires java1.8
6151	87.8	2	1	0	1	1	3	2.5	2	Use DRY design as in previous PA. Partial class javadoc and missing interface javadoc. Partially hard code unit into UI, You create separate ActionListener for each Unit which mean dependency between concrete ActionListener that bind with specific Unit and UI.
6160	82.3	2	1	0	1	0.7	3	0.5	1.5	Partial @ notation javadoc. What is metre1, metre2, etc. that end with number. Hard-code unit into UI.
6186	0.0									No submission.
6194	98.0	2	1	1	1	1	3	3.5	1.5	Some @ notation javadoc missing
6208	87.3	2	1	0	1	1	3	3	1.5	Your jar file print something to console and when program closed process still running. Partial class javadoc. Hard-code unit into UI
6216	44.8	1	0	0	0.5	1	2	2.5	0	Many classes don't have javadoc. No UML diagram. Hard code UnitType into UI. You forget to add menu bar.
6224	63.5	1	1	0	1	1	3	3	2	There is a bug in UI, sometime I can't convert left to right or vice versa. Hard coded UnitType into UI. You should move those things to UnitConverter if you want to use. Why Area and Length have same Unit's name? Names should be different.
6232	86.0	2	1	0	1	1	3	3	1	Hard code ActionListener for each UnitType
6241	2.5								1	no read permission on repo
